# TECHNOLOGY

Match the lens to your surroundings. This will provide optimum clarity for your adventure.

**BROWN**

**YELLOW**

**BROWN GREY YELLOW**

**GREY**

**BluWater® Polarized offers lens colors that range from low light to bright light.**

### **BROWN**

- Variable light and water conditions
- Adds depth to shadow areas
- Enhanced contrast

### **G-TECH™**

- Total ultraviolet protection
- Minimal glare
- Grey lenses with mirror coating
- Enhanced contrast

### **GREY**

- For any light condition
- Depth perception close to normal
- Normal contrast

### **YELLOW**

- Low light, foggy and hazy conditions
- Heightened contrast

**EXPAND YOUR LENS OPTIONS** for hunting, shooting and safety applications. Take a look at our full product line of shatterproof polycarbonate lenses. These are the right choice for any situation where safety is paramount. For a look at this expansive selection visit [WWW.GLOBALVISIONEYEWEAR.COM](http://WWW.GLOBALVISIONEYEWEAR.COM) or call (800) 927-2801 to receive a catalog in the mail.

## Polarized Lens Identification

Polarized lenses act like window blinds. The lens absorbs horizontal light, while allowing vertical light to enter, mitigating glare. An effective method used to determine if two lenses are polarized is to hold them towards each other and turn one vertically. If you cannot see through the lenses, they are polarized. If you can, then at least one is not.

## Lens Materials

TAC (Triacetate Cellulose) is a chemical compound implemented in polarized lenses for superior visual clarity. BluWater® Polarized lenses manufactured with this technology block out 100% of harmful UV rays with wavelengths up to 400 nanometers. The minimum standard for UV protection in the U.S. is 100 nm. Our BluWater® Polarized lenses are made from TAC or shatterproof polycarbonate.

## POLARIZED & ANSI SAFETY RATED

Any item in this catalog with **ANSI Z87+** has polarized lenses and meets ANSI Z87.1-2010 standards for use in industrial applications.

## ANTI-REFLECTIVE

Anti-reflective coating eliminates glare from light reflected into your eyes from the back surface of the lenses, resulting in crisper vision and enhanced contrast.

## FLOATING

The Floating collection is designed with the water sports enthusiast in mind. Most are enabled to float with neoprene or EVA foam, while Buoyant and Paddle are made of TPX®, a floating lightweight polymer.

## G-TECH™

These high-tech lenses have 7 to 13 layers of titanium dioxide and silica. Enjoy enhanced contrast with minimal glare. Salt water is abrasive to any mirror coatings, use with caution around salt water.

## PHOTOCHROMIC

These lenses are designed to provide optimal sight according to existing lighting conditions. Photochromic lenses automatically transform based on the amount of sunlight while blocking harmful ultraviolet rays.

## REPELON™

This optical technology creates an invisible barrier that keeps dirt, sweat and airborne particles from clinging to the lenses, resulting in easy-to-clean, smudge resistant lenses that stay clean longer.

## UV400 POLARIZED

UV400 Polarized lenses filter light rays with wavelengths up to 400 nanometers. They also filter intense reflected light, eliminating glare from reflective surfaces such as water and snow, while enhancing contrast.

# FLOATING

## BUOYANT GR

**FEATURES** Blue Rubber Tips, Blue Rubber Nose Pads, Anti-Reflective Coating on the Back Side of Lenses  
**FRAME** Matte Black Soft Touch  
**LENS** Grey

## BUOYANT GTB

**FEATURES** Blue Rubber Tips, Blue Rubber Nose Pads, Anti-Reflective Coating on the Back Side of Lenses  
**FRAME** Matte Black Soft Touch  
**LENS** G-Tech™ Blue

## BUOYANT 2 GTB

**FEATURES** Blue Rubber Tips, Blue Rubber Nose Pads, Anti-Reflective Coating on the Back Side of Lenses, REPELON™ Coating  
**FRAME** Matte Black Soft Touch  
**LENS** G-Tech™ Blue

## BUOYANT 3 GR

**FEATURES** Anti-Reflective Coating on the Back Side of Lenses  
**FRAME** Matte Black Soft Touch  
**LENS** Grey

## PADDLE GR

**FEATURES** Anti-Reflective Coating on the Back Side of Lenses  
**FRAME** Matte Black Soft Touch  
**LENS** Grey

# PHOTOCHROMIC

Lenses transform according to existing lighting conditions.

**ANSI Z87+**

## 24 KICKBACK Z A/F

**FEATURES** Meets ANSI Z87.1-2010 Standards for use in Industrial Applications, Double-Sided Anti-Fog Coating, Thick Vented EVA Foam, Rubber Ear Pads, Lenses Transform According to Existing Lighting Conditions, Comes Boxed with Microfiber Pouch  
**FRAME** Matte Black Soft Touch Frames  
**LENS** Light Grey to Dark Grey

## 24 SAMSON® 3 BRN

**FEATURES** Double-Injected Gray Rubber on Temples, Gray One-Piece Adjustable Nose Pad, Lenses Transform According to Existing Lighting Conditions, Comes Boxed with Microfiber Pouch  
**FRAME** Matte Black  
**LENS** Light Brown to Dark Brown

## 24 SAMSON® 3 GR

**FEATURES** Double-Injected Gray Rubber on Temples, Gray One-Piece Adjustable Nose Pad, Lenses Transform According to Existing Lighting Conditions, Comes Boxed with Microfiber Pouch  
**FRAME** Matte Black  
**LENS** Light Grey to Dark Grey

# ~~~~~ LIFESTYLE ~~~~~

## BAY BREEZE GR

**FEATURES** Semi-Rimless Frames, Rubber Ear Pads  
**FRAME** Matte Black  
**LENS** Grey

## FLORIDA 1 DEMI BRN

**FRAME** Demi Brown
