TECHNOLOGY

TESTING

ANSI HIGH MASS IMPACT TESTING

Select models of Global Vision® Eyewear pass ANSI Z87.1 standards for safety. These styles must withstand a special weighted and pointed projectile weighing 176 ounces dropped from a height of 50".

ANSI IDENTIFICATION MARKS

All of our frames, temples and lenses are marked with the appropriate safety rating.

Watch our Safety Glasses video for more information on ANSI standards.

BALLISTIC TESTING

Our Hercules® 6, Lieutenant and Ballistech 1 styles pass MIL-PRF-32432 ballistic standards.

Glasses are impacted with a 0.15 caliber, 5.8 grain, T37 shaped projectile at 640 to 660 fps.

Goggles are impacted with a 0.22 caliber, 17 grain, T37 shaped projectile at 550 to 560 fps.

FORKLIFT DURABILITY TESTING

Hercules® is our most durable eyewear line. It passes all the tests established by the American National Standards Institute (ANSI). Additionally, it passes the Global Vision® internal test of the crushing force from our forklift.

FOAM PADDING

VENTED EVA FOAM

Vented, durable foam that provides a comfortable experience.

NBR FOAM

Resilient synthetic rubber foam that provides an excellent seal to the face.

NEOPRENE FOAM

Flexible, synthetic rubber foam that provides a mid-level of contour to the face.

SOFT AIRY FOAM

Soft and absorptive foam that provides a good fit around the face, as it is larger and more cushioned.

INTERLOCKING SYSTEM

A number of our styles feature interchangeable temples and straps, allowing the wearer to customize their frames for different riding conditions. Our interlocking frame system is durable and functional, keeping both frame and temple securely locked.

RX-ABLE STYLES

These styles of frames are compatible with prescription lenses. Look for the "RX-ABLE" indicator by the product displayed.

ShadowLuxe Technology

GETS DARKER

ShadowLuxe lenses get darker than any auto-darkening eyewear on the market today.

WORKS BETTER

These lenses are guaranteed to work up to 95°F. Most auto-darkening lenses won't work as well once the temperature reaches 85°F.

MORE DURABLE

Most similar lenses use a dip coating. ShadowLuxe lenses have the auto-darkening component embedded into the lens that will work better and last longer.

HOW TO ORDER

If our product has "24" and "SD" in the name, that means it's a ShadowLuxe lens. "24" stands for photochromic and "SD" means "Super Dark".
