# TECHNOLOGY

## TESTING

### ANSI HIGH MASS IMPACT TESTING

Select models of Global Vision® Eyewear pass ANSI Z87.1 standards for safety. These styles must withstand a special weighted and pointed projectile weighing 176 ounces dropped from a height of 50".

### ANSI IDENTIFICATION MARKS

All of our frames, temples and lenses are marked with the appropriate safety rating.

Watch our Safety Glasses video for more information on ANSI standards.

### BALLISTIC TESTING

Our Hercules® 6, Lieutenant, Ballistech 1, and 3 styles pass MIL-PRF-32432 ballistic standards.

Glasses are impacted with a 0.15 caliber, 5.8 grain, T37 shaped projectile at 640 to 660 fps.

Goggles are impacted with a 0.22 caliber, 17 grain, T37 shaped projectile at 550 to 560 fps.

## FORKLIFT DURABILITY TESTING

Hercules® is our most durable eyewear line. It passes all the tests established by the American National Standards Institute (ANSI). Additionally, it passes the Global Vision® internal test of the crushing force from our forklift.

TO ORDER CALL 800-927-2801

## FOAM PADDING

### VENTED EVA FOAM

Vented, durable foam that provides a comfortable experience.

### NBR FOAM

Resilient synthetic rubber foam that provides an excellent seal to the face.

### NEOPRENE FOAM

Flexible, synthetic rubber foam that provides a mid-level of contour to the face.

### SOFT AIRY FOAM

Soft and absorptive foam that provides a good fit around the face, as it is larger and more cushioned.

## INTERLOCKING SYSTEM

A number of our styles feature interchangeable temples and straps, allowing the wearer to customize their frames for different riding conditions. Our interlocking frame system is durable and functional, keeping both frame and temple securely locked.

## RX-ABLE STYLES

These styles of frames are compatible with prescription lenses. Look for the "RX-ABLE" indicator by the product displayed.

# TECHNOLOGY

## GLOBAL VISION® LENSES

Global Vision® lenses are crafted from shatterproof polycarbonate, and decentered to provide maximum clarity and peripheral vision. All lenses offer UV400 protection and a scratch resistant coating. They filter out both UVA and UVB rays with wavelengths up to 400 nanometers, offering protection from 99 to 100 percent of harmful light.

### LENS COLORS

#### BROWN POLARIZED

Improves contrast and depth perception. Ideal for variable light conditions.

#### CLEAR

Untinted for low-light or nighttime conditions.

#### CLEAR MIRROR

Clear lens with a mirror coating that provides a one-way mirror. Popular for low-light conditions. Sometimes referred to as an Indoor/Outdoor lens.

#### COLOR

Lens colors may include blue, orange, purple, red or other colors.

#### DRIVING MIRROR

State-of-the-art lens for daytime use, copper tint lens with a mirror coating that's soothing to the eyes.

#### FLASH MIRROR

Smoke lens with a mirror coating.

#### G-TECH™

Multi-layered titanium coatings provide low internal reflectance between the eyes and the inside of the lens, offering unparalleled clarity.

#### GRADIENT

Smoke lens that's darkest at the top and gradually becomes lighter towards the bottom.

#### GRAY POLARIZED

Normal contrast and close to normal depth perception. For any light conditions.

#### MIRROR

Smoke lens with a heavy mirror coating.

#### SMOKE

Distinctive gray tint decreases sunlight exposure.

#### SUPER DARK

Provides additional sun blockage for bright sunny days.

#### YELLOW TINT

Increases depth perception, ideal for overcast days.

#### YELLOW TINT MIRROR

The advantages of yellow tint with a mirror coating.

## LENS FEATURES

### ANTI-FOG

Coating applied to both sides of lenses to help prevent fogging.

### BIFOCAL

A portion of the lens magnifies for reading small print.

### DAWN TO DUSK

D2D lenses are great in changing light conditions. You will enjoy our darkest photochromatic lens during bright light conditions. Not recommended for nighttime use.

### DECENTERED

A lens that has an offset optical center to maintain optical correctness. This is used on quality lenses that have a highly curved surface. The result is no headaches commonly associated with inexpensive sunglasses.

### G-TECH™

Multi-layered titanium provides brilliant lens color and unparalleled clarity.

### PHOTOCHROMATIC <sup>(24)</sup>

Our 24-Hour Lens™ can be worn at all hours of the day, evening, outdoors and indoors because it self-adjusts to the ultraviolet light.

### REPELON™

Repelon™ coating repels moisture, oils and dust buildup. These lenses are easy to clean and stay cleaner longer.

### SHATTERPROOF POLYCARBONATE

Ten times more impact-resistant than plastic or glass lenses.

### UV400

Filters out 99 to 100 percent of both UVA and UVB rays.

## ONE YEAR WARRANTY

Global Vision® Eyewear products are covered by a one-year replacement warranty against manufacturer defects under normal use. Scratches are considered normal wear by industry standards and are not covered under this warranty. Please call us for a return authorization number before mailing anything to us to be returned or replaced.
